YOUR HEALTH - YOUR SAFETY

Operating Instructions

Freezer

- Plug appliance into a nearby plug socket
- Ensure door is closed and leave for a minimum of 2 hours before putting items in. Temperature settings vary, however the highest number setting will indicate the coolest temperature in the freezer – in some instances the temperature of the freezer will be set by the factory

Defrosting Your Freezer:

- This process should be done on a periodic basis i.e. before leaving for Christmas and Easter break or when there is a build up of frost and **before vacating your residences**
- Turn off appliance at the mains and pull out the plug
- Remove all food etc. and drawers
- A bowl of hot water can be placed in the freezer to speed up the process (DO NOT use sharp objects, hairdryers or other electrical appliances to remove the frost). When defrosting has finished dry the interior, replace drawers, plug in and turn on at the mains (if vacating your residences this step is not required). You must wait 2 hours before replacing food into the freezer

Safety:

- The 'Fast Freeze' button should only be used when placing lots of new fresh items in the freezer and should only be on for a MAXIMUM of 30 minutes – if left on for longer or continuously this will burn out the freezer and it will break down
- Always ensure the freezer door is closed when on
- Do not attempt to freeze fizzy drinks

If you are still unclear on the use of any appliance please speak to a member of staff.

If any appliance does not work – NEVER try to fix it yourself, always report it to reception.
